

User Guide Timeline

Navigation

Travel across time by using the time slider or by scrolling: The current year and paradigm are displayed at the top.

Reading stories

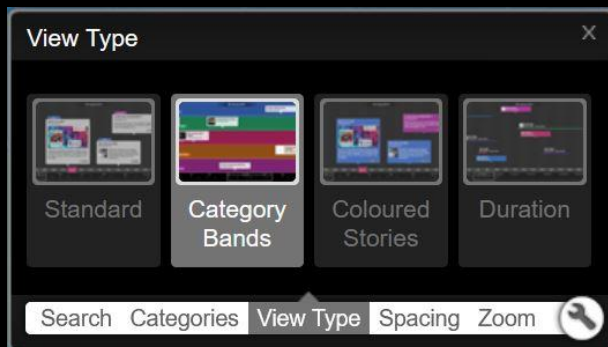

Clicking on a story allows you to read it. Images and videos can be enlarged by clicking on them. Via "Find out more" you are directed to an external link regarding the topic.

Set view

At the bottom left, you can switch to 3d view. Alternatively, the view can be adjusted by clicking on the spanner icon at the bottom right (see next page).

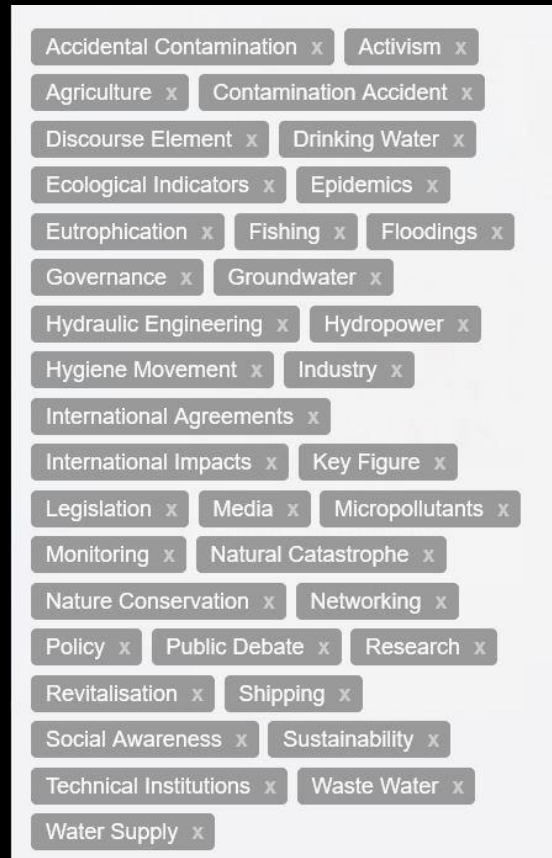

Set views

By clicking on the spanner icon, the entire timeline can be filtered by dimensions(s) under «Categories». Further view options are available under «View Type».

Search function

By clicking on the spanner icon, the search function becomes accessible. Here, the entire timeline can be searched for keywords or «tags» (see below).

Tags

Tags help searching for multiple stories on the same subtopic. To filter the stories, you can either type one of the terms listed below into the search field or click on the tag at the top of a story.
